

MILIONE S.P.A.

Press Release

Milione Spa ("Milione") has obtained an investment grade rating (Moody's Baa3) on the capital structure of the Group which supports the refinancing of the SAVE and Milione debt into a long term investment grade financing platform. The rated financial structure will secure significant additional liquidity for the group to undertake the large capital expenditure program committed with the regulator and will insulate the Group from short term volatility in the debt markets.

This result was possible thanks to the quality of the SAVE' management team and by their successful track record in delivering growth and services to passengers, by the attractiveness of its airports and their infrastructure and by the profile of Milione's shareholders and their support to the long term financial health of the Group.

Milione is controlled by Enrico Marchi's family and funds managed by DWS and InfraVia Capital Partners.
