

Milan, March 30, 2020

Today, the administrator of Tirrenia di Navigazione S.p.A. which is currently in Extraordinary Administration, Gerardo Longobardi, Beniamino Caravita di Toritto and Stefano Ambrosini, carried out in such a dramatic moment for the country, a protective seizure of CIN's current accounts. They did this notwithstanding CIN having communicated to them in writing several times to confirm its willingness to offer guarantees for payment, within the limits of what is permitted, of the claims of Tirrenia in Extraordinary Administration.

We would like to clarify that the company has liquidity but the blocking of the current accounts prevents it continuing to operate.

As a result of the above, the activities of CIN (a company which pursuant to the agreement with the State carries out territorial continuity services by sea to the islands) have been paralyzed. Therefore, with immediate effect, it will be impossible to continue this service and the scheduled trips starting from today on all lines connecting Sardinia, Sicily and Tremiti will not be carried out.
