

July 2020

Npl and other impaired loans

All deals for the first 7 months of 2020
and latest 2019 data revision

in cooperation with

From the beginning of the year to date, **42 transactions on impaired loans for 20.4 billion euros gross** have been announced, after a 2019 in which **82 deals for 52 billion euros** were closed (revised upwards from the preliminary data of **50 billion euros** in [BeBeez's NPL Report published in January](#)) and on paper transactions for **another 20.8 billion** are coming in the year.

In the last two months, in particular, there has been a great acceleration in activity which had stalled due to the Covid-19 emergency, so much so that by the end of April only 19 deals worth EUR 1.8 billion had been mapped out.

The 20.4 billion euro of impaired loans do not include the figure (to date not public) of the Utp corporate leasing securitisation conducted by Intesa Sanpaolo last March when the bank sold the loans to a **securitisation spv (Kerma spv srl)** and the contracts and assets associated with those loans to the **leasing company Kerma LeaseCo srl** (see [other BeBeez article](#)). This is because, on the one hand, the exact figure of the leasing portfolio is not known, part of the total UTP portfolio of 2.7 billion securitised by Intesa Sanpaolo, under the agreement signed with Prelios on 9.7 billion UTP corporate and SME loans, of which 7 billion are instead subject to a management mandate (see [other article by BeBeez](#)). And on the other hand, the 2.7 billion had already been counted in the 2019 tables, given that the agreement was signed last December.

The 20.4 billion also do not include the 310 million euros Utp of **Carige** towards the **Messina** shipping group and 177 million euros of **leasing receivables**, which were also part of the agreement signed by Carige with **AMCO** last December for the sale of a total of **2.8 billion euros of Utp** (see [other article by BeBeez](#)). This is because the two assignments were subject to a number of conditions, as described in the prospectus for Carige's capital increase published at the end of December. Both divestments were due to be completed by the end of March, but in reality nothing has been communicated on the matter and, given that the date fell in full Covid emergency, it is reasonable to assume that an update on the situation will be given when the banking group's quarterly and half-yearly figures, expected at the same time in early August, are presented.

The two most important transactions recorded since the beginning of the year were carried out by **AMCO**, which, on the one hand, signed the agreement to acquire **8.1 billion euro of Utp and Npl from Mps** as part of the Hydra project (see [other article by BeBeez](#)) and, on the other, bought **2 billion euro of Npl from Banca Popolare di Bari** (see [other article by BeBeez](#)).

It is also interesting to note that the third transaction by gross size of the portfolios involved took place on the **secondary market**. This is a transaction conducted by **J-Invest**, which securitized NPLs with a total gross value of **1.701 billion euros** relating to 1,930 unsecured corporate positions, 93% of which originated from banking and financial institutions. The operation involved the issue of senior and junior securities, with the seniors being subscribed by a **fund specialising in private debt** based in London (see [other BeBeez article](#)). Originally, the portfolios acquired concerned single name loans and portfolios of loans acquired through competitive processes and which **at the time of purchase had a gross value of approximately 2.2 billion euros**, which was then reduced to **1.7 billion euros**, thanks to the recovery activity carried out in the meantime by J-Invest.

Finally, the fourth largest deal in terms of gross value concerns a **single name credit of 1.3 billion euros** (see [other BeBeez article](#)). Apollo Global Management, through its exclusive Italian advisor Apeiron, has in fact bought the entire portfolio of **contract reserves of Grandi Lavori Fincosit**, the construction group of the Mazzi family that had requested a white composition with creditors in July 2018 and was then admitted to the composition with creditors procedure, which involves the sale of a number of assets. For Apeiron-Apollo it was an investment of 80 million euros for a gross value of the portfolio of contract reserves of 1.3 billion euros. Investing in the procurement reserves of a construction company essentially means betting on winning a lawsuit between the client and the construction company over the increase in the cost of a contract due to circumstances not attributable to the construction company (e.g. the discovery of archaeological finds or the discovery of an old unexploded bomb). In these cases, the legal cases are often lengthy and the outcome is very uncertain, and if the figures are important, then the construction company has every interest in giving up that potential credit at a discount and collecting the cash. Apeiron has also concluded other transactions of this smaller size.

Finally, two securitization transactions for which the **Gacs guarantee** was requested for senior tranches are: the 1.2 billion euro one by **BPER** (see [other article by BeBeez](#)) and the 999.7 billion euro one by **Banca Popolare di Sondrio** (see [other article by BeBeez](#)).

From the assignors' point of view, **Unicredit** has been the most active in recent months in terms of number of transactions. In recent days, in fact, the bank announced the signing with **Ifis NPL (Ifis Bank Group)** and **Gaia spv**, a securitization vehicle financed by Guber Banca and **Barclays Bank plc** and managed by Guber, of an agreement for the assignment without recourse of a portfolio of 840 million euro gross non-performing loans deriving from unsecured credit agreements with SMEs (see [other BeBeez article](#)).

Just one day before, Unicredit had announced the sale of 702 million euros of NPL, again to corporate SMEs, sold to **Illimity** and again to Guber Banca and Barclays Bank, through Gaia spv (see [other BeBeez article](#)). At the end of June, on the other hand, Unicredit had sold **335 million euros of consumer NPL to Banca Ifis**. The transaction involved three portfolios with a total nominal value of approximately 155 million euro, plus 4 additional consumer portfolios (receivables from current account contracts, personal loans and credit cards) sold through a forward flow agreement, up to 180 million euro nominal value (see [other BeBeez article](#)).

With regard to the incoming disposals, mapped by *BeBeez* because officially announced or known to the market, there are three transactions under study that in the structure could replicate the transaction conducted by **Intesa Sanpaolo with Prelios sgr** in relation to the bank's Utp portfolio. Unicredit, in fact, has been thinking for some months now about a similar hypothesis that would involve 13 billion euros of Utp, half of which could be sold and the other half could be given a management mandate (see [other BeBeez article](#)). **Crédit Agricole Italia** would also be working on similar hypotheses, which could manage a portfolio of 1 billion Utp out of the total of 1.6 billion on the balance sheet at the end of 2019, and sell the rest (see [other article by BeBeez](#)). Finally, **Banco BPM** would also be thinking about what to do in relation to 2 billion euros of Utp, of which 1 billion could be sold (see [other BeBeez article](#)).
