

September 2020

# Venture capital

## All rounds in the first 8 months of 2020

In the first eight months of 2020 there were **181 investment rounds**, of which **103 rounds concluded by venture capital investors in the broad sense and 78 rounds concluded through equity crowdfunding campaigns** (net of real estate campaigns). All for a total of **420 million euros** invested by venture capital funds, investment holding companies, corporate venture capital, business angels and crowdfunding equity platform crowdfunding crowdfunding crowdfunding crowd, but also by venture debt funds and other lenders, including banks. Excluding the latter, venture capital raised in total 364 million euros.

Focusing on the first six months of 2020 alone, **138 investment rounds** were counted, **including 78 rounds concluded by venture capital investors in the broadest sense and 60 rounds concluded through equity crowdfunding campaigns** (net of real estate campaigns). Excluding the latter transactions, which in the first half of the year were reduced to only e 5 million of **Casavo's minibonds** subscribed by Amundi's private debt fund (see [other article of BeBeez](#)), it fell to e 259 million.

---

*In the first half of the year, Italian startups and scaleups announced 113 investment rounds for 259 million euros, up from 510 million euros in 2018*

---

The data come from [BeBeez Private Data](#) (the *BeBeez* database available on subscription, [click here for information and an upgrade of your BeBeez News Premium subscription](#)) and from *CrowdfundingBuzz* (published by [EdiBeez srl](#) as *BeBeez*). On the latter front, in particular, 60 campaigns were successfully completed in the six months, net of real estate, for a total of 28 million euros. Of these 60 campaigns, 11 collected at least 500 thousand euros, for a total of 18.15 million euros.

The figure of 264 million and 138 rounds in total compares with that of 2019 as a whole, when *BeBeez* had mapped 244 rounds for a total of approximately €605.6 million, up sharply from €510 million, spread over 179 companies, registered in 2018 (see [BeBeez's 2019 Venture Capital Report here](#)).

The first six months, therefore, highlighted the full weight of the Covid-19 pandemic that held back harvesting operations. The trend was also highlighted by the Vem Report of the Liuc University of Castellanza, which calculated that in the six months overall venture capital and **corporate venture capital** invested € 119 million out of 36 rounds, syndication activities between venture capital, corporate venture capital and **business angels** recorded investments of € 98 million out of 21 operations and business angels alone invested € 31 million in 31 rounds. The total of these activities brings the early stage chain, according to Vem, to have invested 248 million euros out of 88 rounds (see [BeBeez article](#)).

It should be noted, however, that 17 companies collected rounds of at least 3 million euros, for a total of 177 million euros. Of these, 5 startups raised over 10 million euros, for a total of 116 million, but a large part is represented by **Progetto Banca Idea**, the fintech banking startup promoted by **Roberto Nicaastro**, which alone raised 45 million euros (see [BeBeez article](#)). By 2019, however, 31 companies had raised at least 3 million euros in investment rounds, for a total of 491 million euros. Of these, 7 had raised over 20 million euros each in the year. Also in 2018 the total number of startups and scaleups with rounds over 3 million euro had been 31, but had raised 408 million euro. In 2017, however, only 13 startups had collected at least 3 million rounds for a total of €110 million.

*There are 17 companies that have collected at least 3 million euros in investment rounds during the six-month period. Another 12 did so between July and August*

At the turn of July and August, however, a certain recovery in the collection activity of Italian startups and scaleups was noted, with **25 rounds mapped** by *BeBeez*, for a total of **156 million euros** in capital raised, to which must be added **18 crowdfunding equity campaigns** (net of real estate campaigns) successfully concluded, which raised a total of 6 million euros (source: [CrowdfundingBuzz](#)). Of these new campaigns, 4 have raised more than 500 thousand euros, for a total of 3.3 million euros.

It should be noted, however, that of the total of 156 million, **over 51 million is represented by capital raised in the form of debt**. In particular, these are the 30 million euros of new finance that the **e-Novia** startup factory has secured, of which 21 million in bonds converted and 9 million in bank credit lines (see [BeBeez article](#)); 15 million euros collected from the scaleup of the new space sector **D-Orbit**, which has secured financing from the **European Investment Bank** (see [BeBeez article](#)); 5.85 million euros in a credit line granted by **Banco Bpm** to **ArteOlio** (see [BeBeez article](#)); and 500 thousand euros in bonds converted by **Sealance**, the producer of the DeepSpeed marine electric motor (see [BeBeez article](#)).

It should also be noted that between July and August, 12 startups announced rounds of over 3 million euros and four of them raised at least 15 million euros. On the podium of the equity collection is **Enthera**, a biotech company dedicated to the development of new therapeutic approaches for diabetes and gastrointestinal diseases, which grossed a round of 28 million euros, led by **Sofinnova Partners** and **AbbVie Ventures**.

This was followed by **Innovheart**, a company developing new mitral valve replacement systems, which closed a €20 million round, led by **Genextra, Panakes Partners, Cdp Venture Capital** and **Indaco Venture Partners** (see [BeBeez article](#)). And if we also consider the capital raised in the form of debt, then it was **e-Novia**, with its 30 million euros in bonds and credit lines, that beat all of them, as mentioned above.

Finally, a certain m&a activity on the startups financed is worth mentioning. In particular, by far the most important transaction was the one announced at the beginning of June on **Tannico**, with **Campari Group** taking over **49%** of the well-known e-commerce platform dedicated to wine in Italy for **23.4 million euros** in cash (see [BeBeez article](#)). Campari Group acquired 39% of the capital of Tannico from the founder **Marco Magnocavallo** and the investors **P101 sgr** and **Box srl** and simultaneously subscribed a reserved capital increase to reach a total stake of 49%.

**Notes:** \* US dollars (dollar-euro exchange rate 1.10); \*\*new investors *in bold*; previous investors who participated *in* the last round *in bold and italics*.

### Venture capital operations on Italian companies (or founded by Italians) in the first half of 2020
